

1gdynamics

Complete range of support services for the Vibration Test Industry

1g Dynamics supports major companies within the Vibration Test Industry

1gdynamics

1g Dynamics primary activity is supporting users of Vibration Test Systems. We are completely flexible and able to meet specific customer needs, whether these involve preventative maintenance, breakdown repair or independent technical advice. Our aim is to provide users with solutions that will keep their systems running safely and reliably.

1g Dynamics was formed in 2017 with the merger of Vibrattech Limited and Cambridge Vibration Maintenance Services Limited (CVMSL) to create a world leading vibration service and maintenance organisation. The alliance is further enhanced with investment provided by IMV Corporation in a new production facility at their extended and much improved Hertfordshire site. 1g Dynamics engineering team will work independently as a symbiotic partner with IMV to provide a complete range of support services to the industry.

Our newly created company, 1g Dynamics will maintain the varied and effective service to all customers Worldwide.

- ◆ Installation, maintenance and breakdown repair
- ◆ Sales of New and Refurbished Vibration Test Systems
- ◆ UKAS Accredited Accelerometer Calibration Laboratory
- ◆ Spare Parts and Rewinds on a range of armatures from a variety of manufacturers
- ◆ Refurbishment Centre - total system rebuild, mechanical and electronic repairs
- ◆ UK Vibration Test House - consultancy services, qualification and final results analysis

All services are backed up by a world-class quality management system, certificated to ISO9001:2015
